Professional Summary

Software Engineer with expertise in Java, JavaScript, React, and Object-Oriented Design, with a strong background in developing scalable applications. Experienced in working with both SQL and NoSQL databases to create efficient solutions. Eager to expand my skill set and stay up-to-date with emerging technologies to tackle new challenges and drive continuous improvement.

Education

Purdue University, Master of Science in Computer Science — GPA: 3.8 — December 2024
Jawaharlal Nehru Technological University, BS in Computer Science — August 2020

Indianapolis, USA
Hyderabad, India

Experience

Holiday Channel

February 2025 – present

Software Engineer Intern

Remote

- Achieved a 15% increase in user engagement by closely collaborating with UI/UX designers to understand design goals and user behaviors, and implementing optimized, responsive front-end components using React, TypeScript, and Tailwind CSS.
- Implemented interactive data visualizations using Recharts, allowing users to gain deeper insights into their budget and spending patterns.
- Designed and implemented 10+ RESTful APIs using Node.js, achieving a 30% improvement in response time and ensuring secure, scalable, and high-performance data handling across multiple budget tracking modules.
- Utilized Supabase for data storage, leveraging its real-time capabilities and PostgreSQL foundation to ensure efficient, scalable, and secure data management.

Accenture

December 2020 – December 2022

Java Developer

Hyderabad, India

- Enhanced on-time deliveries by 15% and improved customer satisfaction by implementing logic to calculate estimated delivery dates for spare parts ordered using Java and Spring Boot.
- Boosted sales by 25% by designing and implementing RESTful APIs for CRUD operations in promotions module, streamlining vehicle parts management, discounts, and pricing updates.
- Minimized order-related inquiries by 20% by integrating real-time tracking through IBM MQ and optimizing the Promised Delivery Date logic in an event-driven order processing system.
- Increased operational efficiency by 10% by developing a Spring Batch program to enhance vehicle tracking.
- Reduced code conflicts by 40% and minimized downtime by 10% by resolving 95% of production issues within 24 hours and implementing version control with Bitbucket to enhance team efficiency and system reliability.
- Saved 20 hours of debugging time per project and ensured defect-free delivery by implementing 50+ JUnit tests, achieving 80% code quality on SonarQube, and thoroughly testing functionalities with Postman to maintain 100% test coverage and high coding standards.

Technical Skills

Languages: Java, JavaScript, Python, Nodejs, Typescript, HTML, CSS

Frameworks: React, Spring (Spring Boot, Spring MVC, Spring AOP), Restful APIs, Hibernate, ORM

Version Control/DevOps: Bitbucket, Jira, GitHub, Jenkins, CI/CD, Swagger

Databases/Testing Tools: MYSQL, Oracle, PostgreSQL, NOSQL, MongoDB, Junit, Unit Testing, Mockito, Postman

Others: Agile (Scrum), SOLID principles, Object-Oriented Design, SDLC, Design Patterns, AWS Cloud.

Cerification: AWS Cloud Solutions Architect Associate

Projects

Movie Recommendation System | GitHub | *Java, SpringBoot, MongoDB*

- Developed a movie recommendation system using MongoDB, implementing CRUD operations and RESTful APIs to manage movie data, including titles, genres, and directors.
- Utilized aggregation pipelines for efficient querying and search functionality based on user preferences, leading to a more personalized movie recommendation experience.

AI Chrome Extension | YouTube | *JavaScript, HTML, CSS*

- Implemented a MutationObserver to detect and process text fields dynamically, used debounced event listeners for efficient input tracking, and enabled real-time AI-powered suggestions for seamless user interaction.
- Developed an inline ghost text UI for AI-generated suggestions, implemented dynamic positioning based on cursor location, and integrated Tab-key functionality.
- Designed a background service worker for handling AI requests, ensuring reliable AI responses with minimal failures.
